

in it for permitting skin to be drawn inwardly of it, and a connection tube formed in said applicator, said tube communicating with said cavity;

- a vacuum pump associated with said housing; and
- a connection between said vacuum pump and [one of said head and] said applicator to impart at least a partial vacuum in the cavity of the applicator so that placement of the head on a human body results in the application of a force combination of mechanical oscillation and suction, said connection including a suction line carried externally of said drive cable, said suction line having a first end operatively connected to said vacuum pump and a second end operatively attached to said connector tube.
- 5. (Amended) The apparatus of claim 4 wherein said [valves] <u>viles</u> are removably mounted to the apparatus.

Cancel Claim 8.

9. (Amended) The apparatus of claim [8] 7 wherein said vacuum connection is attached [as an] to said applicator by quick connect device.

Cancel Claim 10 - 14.

15. (Amended) A therapy massage device comprising:

a housing;

a motor mounted to the housing;

a vacuum pump mounted to the housing;

a drive cable operatively connected to the motor;

a massage head peratively [drive] driven by the cable;
